

## MY VISION

For over two decades, I've worked to restore fragile ecosystems and empower communities across Jordan and West Asia.

My candidacy for the IUCN Council is a continuation of that mission, to share regional knowledge, shape inclusive policy, and protect nature through people-centered solutions.

## TRANSFORMATIVE CHANGE

1

Strengthening engagement with IUCN Members across West Asia

2

Keeping biodiversity and Nature-based Solutions at the heart of policy and action

3

Promoting collaboration between communities, scientists, and decision-makers

4

Advocating for evidence-based, just, and inclusive conservation strategies

5

Supporting countries in scaling up Nature-based Solutions to combat climate impacts
